Foreword

The word ***“INJUSTICE”*** I believe that all of us knew exactly what does it means? I’m sure that all of us had experienced the injustice in different types of forms; some may be experience in the form of working, some may be experience in the form of being treated in the society, and others may be experience in other ways; whatever types of injustice that you had been experienced or you are experiencing right now; it’s still ***“INJUSTICE”*** which means there is no such word of “fairness”, “justice” involved if injustice happened; however, I still believe that even though, sometimes we are facing injustice that we feel like everything going against us and want to give up; I just want to encourage you and say one thing that ***“NEVER GIVE UP!”*** and always fight for it when you still alive and still breathing; in my opinion, I will allow only one type of people that can give up, which is the dead people; so if you are not dead yet, don’t give up; and I’m sure that you will see the rainbow after you had been through the storm; therefore, I would like to encourage you to “Believe in yourself” like I do, and you can overcome all the obstacles and injustice in life smoothly. I had experienced a lot of injustice in my whole life; but I never ever thought that I would have to sue someone and had to go to the court;

however, I did it because I felt that it was necessary thing for me to do, I didn't do it because I wanted money, but I did it because of the "principle"; I wanted to teach the lesson to the person that had treated other people like piece of garbage, but because she thought that she has money and power, therefore NO ONE dares to sue her and she thought that she can do it to anyone if she wants, but sorry that I was not that EASY victim that she thought she could do that to me, therefore, I had to sue her; I did it and I won the case and that's why I think that it's very important messages that I would like to share with the whole world and want you to know how to deal with it. This is the starting point of why I think my topic about **"How to Win a Civil Law Suit When You're The Underdog"** is interesting and needs to send the messages across this whole world.

As I believe in every societies in almost every countries; the RICH always be the most powerful group who controls the economy of the country and there are big gap between the RICH and the POOR; as for the average group, they just have to work and have just enough money to survive but NOT enough for saving. Am I right? The big difference about the financial situation between the RICH and the POOR are too big that sometimes you can't think

of that! Now, I believe that in the history of the poor people that had been treated very badly and they felt like it had been injustice to them and they tried to sue the rich & powerful people, most of the case had been failed because the poor couldn't afford the best lawyer, or had been threatened by the rich, or whatever other reasons; so the poor had to accept their unfortunate, while the rich still enjoy doing their injustice. Well, in this case, I didn't mean "ALL the rich people" will have this habits; it's only few (or) may be most of them are, as I had experienced it in my society and it's only base on my opinion.

Well, I have to admit to you that I just can't stand the people who like to take advantage on others, especially to those who can't protect themselves, and this makes this people "*THE TAKER*" think that they can do anything what they want, and that's why it really bother me, that I want to teach them (or) send the message to them that, "Hey!, **NOT everyone** that you can treat like piece of garbage, even though, that person is a scavenger or janitor; he is still "human being" and he has the equal rights same like you and me; You are NOT ABOVE us and no one above us EXCEPT GOD!" And I guessed that was my whole point why I made my decision to sue my former employer, just to send her a "message", so in the future, hopefully that she

will not repeat this same unacceptable action towards her employees again.

Now, I would like to inform you that “YOU” as the owner of this e-book, you are a “lucky person” because you will learn a lot of useful information that I think it will be very useful for you in case if you are experiencing the injustice right now and may be is considering about suing someone that had treated you badly. In “**How to Win a Civil Law Suit When You’re The Underdog**”, it is purely base on my injustice experience and I believe that some of the information, you will be able to adapt them and apply for your case.

I decided to share my experience about Underdog Case because I think that it is necessary for everyone to stand up for ourselves to defeat unfair rules and unfair people. It doesn’t matter who you are, where you live, what you believe; if you feel that “injustice” are entering into your life right now, you got to do something; sometimes, it’s better to send out the “message” and let the other side know how you feel and hopefully that things can be settled down in a good way, however, when you have to stand up for yourself don’t think about winning the case first, just think about the procedures and how are you going to do it

properly; once you do it right, the consequences will follow accordingly. And remember one thing, as it may sounds quite scary to you but if it's not your time to go then nothing can hurt you, just believe in that, because for my case, when I told my mom that I'm going to sue my former employer because she failed to comply with my employment contract and it against the labor laws what she did to me; my mom said "Just leave it, she is rich and powerful, if you will sue her, she will probably hire someone to kill you. Don't do it, just leave it." And this is me, that replied to my mom; "Mom, because people are thinking like what you just said that just leave it, she is rich and powerful, you will get kill if you have a problem with her, blah blah blah and that's why our society is like this. No, I'm not going to let this happened, I want to send the message to her that she can't do this to other people because it's unfair and it's the principle that I'm trying to send across, I didn't think about getting my money back; but honestly just want to teach her a lesson! If I'm going to die because of suing her, then just let it happens that means my time here on planet earth is finished and my soul will be free to go somewhere else." Then my mom just leave it up to me to make my own decision about suing case. And that's why I move forward in making this case to happen and in the end, I won!!!

Thanks to you as my reader, thanks so much for supporting my e-book. I am sure that the money you had spent on buying this e-book, will be worthwhile for you and you will learn something that actually will be helpful in protecting yourself from the injustice. May God bless you to have a “power of NEVER GIVE UP!!!” and “Believe in yourself”. Cheers!!!

Chapter 1: Things You NEED & Things You HAVE

In this first chapter, I want to share with you about my own experience on things I need to have and things that I have to have in order to prepare myself in suing my former employer. As for my opinion, I think it doesn't matter which type of industries you are in, if you found yourself had been treated unfairly, i.e. got fired without doing anything wrong, had been taking advantages all the time, etc. Then it's the time that you need to do something RIGHT and stand up for yourself and for my case, to make the long story short I can sum up in one sentence that my former employer failed to comply with my employment contract and it against the labor laws what she did to me. Therefore, I think that I need to find the JUSTICE for myself and I wanted to teach her that it's not about the money but it's the PRINCIPLE what she did to me and other employees are unacceptable actions!!!

Now when I realized that I need to do something in order to ask for the JUSTICE for myself and also giving the message to the former employer; I had to sit down and think about it carefully about what I need to have and what I have to have in order to make my case happen. Therefore, I would like to share with you about things that

I think I need to have and things that have to have; here are they:

Things NEED to have: 1) *Courage*: Courage to do what is right. 2) *Confidence*: Confidence that justice must exist. 3) *Encouragement*: Give yourself an encouragement. *Things HAVE to have:* 1) *Contract*: Employment contract and other relevant documents. 2) *Witnesses*: Asking my ex-colleagues to be the witnesses for my case.

Things NEED to have

- 1) **Courage:** *Courage to do what is right.* Well, first of all, I would like to let you know that once I decided to sue my former employer, I had told my mom and she told me “Just leave it, she is rich and powerful, if you will sue her, she will probably hire someone to kill you. Don’t do it, just leave it.” And this is me, that replied to my mom; “Mom, because people are thinking like what you just said that just leave it, she is rich and powerful, you will get kill if you have a problem with her, blah blah blah and that’s why our society is like this. No, I’m not going to let this happened, I want to send the message to her that she can’t do this to other people because it’s
